The Geological Society of America Bulletin

Volume 99

Contents

JULY

1–6 United States earth sciences, status and future: How bad, how good? .... *W. G. Ernst*

7–20 Structural style and kinematics of an underplated slate belt, Kodiak and adjacent islands, Alaska .... *James C. Sample and J. Casey Moore*

21–29 The generation of magnetic anomalies by combustion metamorphism of sedimentary rock, and its significance to hydrocarbon exploration .... *S. M. Cisowski and M. Fuller*

30–41 Ore deposits of the wesern United States in relation to mass distribution in the crust and mantle .... *Jan Kutina and T. G. Hildenbrand*

42–65 Sedimentology and tectonic significance of Wolfcampian (Lower Permian) conglomerates in the Pedregosa basin: Southeastern Arizona, southwestern New Mexico, and northern Mexico .... *Richard A. Armin*

66–77 Paleosols spanning the Cretaceous-Paleogene transition, eastern Montana and western North Dakota .... *David E. Fastovsky and Kevin McSweeney*

78–86 Authigenic "spherules" in K-T boundary sediments at Caravaca, Spain, and Raton basin, Colorado and New Mexico, may not be impact derived .... *Glen A. Izett*

87–93 Emplacement age of post-tectonic granites in southern Guinea (West Africa) and the peninsular Florida subsurface: Implications for origins of southern Appalachian exotic terranes .... *R. D. Dallmeyer, M. Caen-Vachette, and M. Villeneuve*

94–102 Conditions for crack propagation by frost wedging .... *Thomas M. Tharp*

103–112 Origin of brine in the San Andres Formation, evaporite confining system, Texas Panhandle and eastern New Mexico .... *Alan R. Dutton*

113–126 Early Paleozoic metamorphism at two crustal levels and a tectonic model for the Pennsylvania-Delaware Piedmont .... *Mary Emma Wagner and LeeAnn Srogi*

127–134 Paleodischarge of the late Pleistocene Bonneville Flood, Snake River, Idaho, computed from new evidence .... *Robert D. Jarrett and Harold E. Malde*

135–157 Medals and Awards for 1986

AUGUST

161–176 Timing of structural events in the Himalayan foothills of northwestern Pakistan .... *Robert S. Yeats and Ahmad Hussain*

177–186 Surface processes, deposits, and development of star dunes: Dumont dune field, California .... *Jamie Nielson and Gary Kocurek*

187–200 A depositional model for outwash, sediment sources, and hydrologic characteristics, Malaspina Glacier, Alaska: A modern analog of the southeastern margin of the Laurentide Ice Sheet .... *Thomas C. Gustavson and Jon C. Boothroyd*

201–214 Structural geology and accretionary history of the Northwest Cascades system, Washington and British Columbia .... *E. H. Brown*

215–223 Playa-lake basins on the Southern High Plains of Texas and New Mexico: Part I. Hydrologic, geomorphic, and geologic evidence for their development .... *W. R. Osterkamp and Warren W. Wood*

224–230 Playa-lake basins on the Southern High Plains of Texas and New Mexico: Part II. A hydrologic model and mass-balance arguments for their development .... *Warren E. Wood and W. R. Osterkamp*

231–243 Paleogeographic and tectonic implications of the Golconda allochthon, southern Toiyabe Range, Nevada .... *H. A. Babaie*

244–260 The Quaternary sediments of Banquereau, Scotian Shelf .... *Carl L. Amos and Robert G. Knoll*

261–271 Late Holocene sediment storage in canyons of the Colorado Plateau .... *William L. Graf*

272–291 Field, chemical, and physical constraints on mafic-felsic magma interaction in the Lamarck Granodiorite, Sierra Nevada, California .... *Thomas P. Frost and Gail A. Mahood*

292–302 Travertine deposits of Soda Dam, New Mexico, and their implication for the age and evolution of the Valles caldera hydrothermal system .... *Fraser Goff and Lisa Shevenell*

303–314 Temporal variations in column height and magma discharge rate during the 79 A.D. eruption of Vesuvius .... *Steven Carey and Haraldur Sigurdsson*

315–318 Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah: Discussions and reply

Discussion .... *Virginia T. McLemore*

Discussion .... *Anne Kramer Loring, Russell E. Clemons, and Dale G. Armstrong*

Reply .... *E. E. Larson, P. E. Patterson, G. Curtiss, R. Drake, and F. E. Mutschler*

SEPTEMBER

319–324 Significance of agglutinate mounds on lava flows associated with monogenetic cones: An example at Sunset Crater, northern Arizona . . . . *Richard F. Holm*

325–330 The relationship between the iridium anomaly and palynological floral events at three CretaceousTertiary boundary localities in western Canada . . . . *John F. Lerbekmo, Arthur R. Sweet, and Robert M. St. Louis*

331–340 Fan-deltas and braid deltas: Varieties of coarse-grained deltas . . . . *John G. McPherson, Ganapathy Shanmugam, and Richard J. Moiola*

341–353 Cenozoic extension and tilting recorded in Upper Cretaceous and Tertiary rocks at the Hall molybdenum deposit, northern San Antonio Mountains, Nevada . . . . *Stephen A. Shaver and Michael McWilliams*

354–361 U-Pb and Th-Pb whole-rock isochrons from metavolcanic rocks of the Carolina slate belt . . . . *A. P. LeHuray*

362–375 Tectonic implications of paleomagnetic and geochronologic data from the Yukon-Koyukuk province, Alaska . . . . *R. A. Harris, D. B. Stone, and D. L. Turner*

376–384 Late Pleistocene and Holocene deglaciation and environments of the southern Chugach Mountains, Alaska . . . . *Les Sirkin and Samuel J. Tuthill*

385–394 The isotopic and chemical evolution of mineralization in septarian concretions: Evidence for episodic paleohydrogeologic methanogenesis . . . . *D. I. Siegel, Steven C. Chamberlain, and William P. Dossert*

395–404 The Soledad Caldera, Bolivia: A Miocene caldera with associated epithermal Au-Ag-Cu-Pb-Zn mineralization . . . . *Stewart D. Redwood*

405–413 Drainage development on basaltic lava flows, Cima volcanic field, southeast California, and Lunar Crater volcanic field, south-central Nevada . . . . *John C. Dohrenwend, Athol D. Abrahams, and Brent D. Turrin*

414–426 Upper Devonian Catskill Delta margin cyclic sedimentation: Brallier, Scherr, and Foreknobs Formations of Virginia and West Virginia . . . . *Jay Van Tassell*

427–439 The Quebradillas Limestone (Miocene-Pliocene), northern Puerto Rico, and tectonics of the northeastern Caribbean margin . . . . *Mounir T. Moussa, George A. Seiglie, Arthur A. Meyerhoff, and Irfan Taner*

440–442 Stratigraphic classification and nomenclature of igneous and metamorphic rock bodies . . . . *International Subcommission on Stratigraphic Classification (Amos Salvador, Chairman)*

443–444 Unconformity-bounded stratigraphic units: Discussion and reply
Discussion . . . . *J. G. Johnson*
Reply . . . . *International Subcommission on Stratigraphic Classification (Amos Salvador, Chairman)*

OCTOBER

445–462 Hydrostratigraphy and distribution of secondary permeability in the Brule Formation, Cheyenne County, Nebraska . . . . *Warren Barrash and Roger H. Morin*

463–470 Late Cenozoic volcanism of the southeastern Colorado Plateau: I. Volcanic geology of the Lucero area, New Mexico . . . . *W. Scott Baldridge, Frank V. Perry, and Muhammad Shafiqullah*

471–479 Conodont color and textural alteration: An index to regional metamorphism, contact metamorphism, and hydrothermal alteration . . . . *Vivian A. Rejebian, Anita G. Harris, and J. Stephen Huebner*

480–490 Stratification and paleocirculation of the Late Cretaceous Western Interior Seaway of North America . . . . *Ellen Krogh Wright*

491–510 Structural evolution of the Pulaski thrust system, southwestern Virginia . . . . *Mervin J. Bartholomew*

511–528 Basaltic rocks in the Rensselaer Plateau and Chatham slices of the Taconic allochthon: Chemistry and tectonic setting . . . . *N. M. Ratcliffe*

529–538 Tectonic significance of and Early Proterozoic two-province boundary in central Arizona . . . . *Karl E. Karlstrom, Samuel A. Bowring, and Clay M. Conway*

539–551 Triassic olistostrome and shelf-basin transition in the western Great Basin: Paleogeographic implications . . . . *Frederick R. Heck and Robert C. Speed*

552–568 The case for tectonic denudation by the Heart Mountain fault—A response . . . . *William G. Pierce*

569–578 Geochemistry and tectonic setting of pre-collision Cretaceous and Paleogene volcanic rocks of Ecuador . . . . *M. Lebras, F. Mégard, C. Dupuy, and J. Dostal*

579–594 Rainfall, ground-water flow, and seasonal movement at Minor Creek landslide, northwestern California: Physical interpretation of empirical relations . . . . *Richard M. Iverson and Jon J. Major*

595–597 Preserved stable isotopic signature of subaerial diagenesis in the Mescal Limestone, central Arizona: Implications for the timing of a terrestrial plant cover: Discussion and reply
Discussion . . . . *Volker C. Vahrenkamp and Victor Rossinsky, Jr.*
Reply . . . . *L. Paul Knauth and Mark A. Beeunas*

598–600 Sedimentation in the Chile Trench: Depositional morphologies, lithofacies, and stratigraphy: Discussion and reply
Discussion . . . . *G. Shanmugam and J. G. McPherson*
Reply . . . . *T. M. Thornburg and L. D. Kulm*

601–603 Vent sites and flow directions of the Otowi ash flows (lower Bandelier Tuff), New Mexico: Discussion and reply
Discussion . . . . *Stephen Self and Bruce N. Turbeville*
Reply . . . . *Donald B. Potter and Christa M. Oberthal*

NOVEMBER

605–617 Surface morphology of columnar joints and its significance to mechanics and direction of joint growth .... *James M. DeGraff and Atilla Aydin*

618–632 Polyphase deformation in Sierra del Cuervo, Chihuahua, Mexico: Evidence for Ancestral Rocky Mountain tectonics in the Ouachita foreland of northern Mexico .... *James W. Handschy and Russ Dyer*

633–653 The transition from a passive margin to an Upper Cretaceous foreland basin related to ophiolite emplacement in the Oman Mountains .... *Alastair Robertson*

654–662 Interaction of basement uplift and thin-skinned thrusting, Moxa arch and the Western Overthrust Belt, Wyoming: A hypothesis .... *David H. Kraig, David V. Wiltschko, and John H. Spang*

663–673 Sedimentology and paleohydrology of glacial-lake outburst deposits in southeastern Saskatchewan and northwestern North Dakota .... *Mark L. Lord and Alan E. Kehew*

674–685 Proterozoic crustal history of the western United States as determined by neodymium isotopic mapping .... *Victoria C. Bennett and Donald J. DePaolo*

686–698 Late Mississippian thrombolite bioherms from the Pitkin Formation of northern Arkansas .... *G. E. Webb*

699–717 Paleozoic gneissic granitoids in the Shoo Fly Complex, central Sierra Nevada, California .... *Charles Merguerian and Richard A. Schweickert*

718–728 Tectonic and eustatic control on late Cenozoic sedimentation within an active plate boundary zone, west coast margin, Jamaica .... *Malcolm D. Hendry*

DECEMBER

729–738 Thermal genesis of dissolution caves in the Black Hills, South Dakota .... *M. J. Bakalowicz, D. C. Ford, T. E. Miller, A. N. Palmer, and M. V. Palmer*

739–747 New paleomagnetic results from the Eureka Sound Group: Implications for the age of early Tertiary Arctic biota .... *Lisa Tauxe and David R. Clark*

748–762 Lithologic mapping in arid regions with Landsat thematic mapper data: Meatiq dome, Egypt .... *Mohamed Sultan, Raymond E. Arvidson, Neil C. Sturchio, and Edward A. Guinness*

763–770 The Mortagne granite pluton (France) emplaced by pull-apart along a shear zone: Structural and gravimetric arguments and regional implication .... *Bruno Guineberteau, Jean-Luc Bouchez, and Jean-Louis Vigneresse*

771–778 Paleogeographic significance of a Permian sedimentary megamictite in the Central Belt of the northern Sierra Nevada .... *Rodney Watkins, Chris E. Reinheimer, James W. Wallace, and Merlynd K. Nestell*

779–791 The Smartville intrusive complex, Sierra Nevada, California: The core of a rifted volcanic arc .... *James S. Beard and Howard W. Day*

792–802 Structure of the continental margin of southwestern Panama .... *David A. Okaya and Zvi Ben-Avraham*

803–813 Geochemistry of late Middle Jurassic–Early Cretaceous igneous rocks on the eastern North American margin .... *Georgia Pe-Piper and Lubomir F. Jansa*

814–826 The crustal heritage of silver and gold ratios in Arizona ores .... *S. R. Titley*

827–832 Geological applicability of critical-wedge thrust-belt models .... *Nicholas B. Woodward*

833–844 Crustal structure of eastern Nevada from COCORP deep seismic reflection data .... *E. Hauser, C. Potter, T. Hauge, S. Burgess, S. Burtch, J. Mutschler, R. Allmendinger, L. Brown, S. Kaufman, and J. Oliver*

845–851 A detailed chronology of the most recent major eruptive period at Mount Hood, Oregon .... *Kenneth A. Cameron and Patrick T. Pringle*

852–865 Upper Proterozoic evaporites in the Amadeus basin, central Australia, and their role in basin tectonics .... *John F. Lindsay*

866–879 Geochronology of intrusive and metamorphic rocks in the Pilot Range, Utah and Nevada, and comparison with regional patterns .... *David M. Miller, Wendy C. Hillhouse, Robert E. Zartman, and Marvin A. Lanphere*

880–885 Estimated thickness of granitoid rocks in the western Sierra Nevada foothills near Oakhurst, California: A hydrogeological approach .... *Seymour Mack*

886–888 Structures, textures, and cooling histories of Columbia River basalt flows: Discussion and reply
Discussion .... *Anthony R. Philpotts and David H. Burkett*
Reply .... *Philip E. Long and Bernard J. Wood*

888 Errata

889 1987 Indexes
